

FIRECORE TRAINING

FUNDAMENTAL FIREGROUND TRAINING

Develop Your Organization's Capabilities Through Engaging Training

FIRECORE Training Can Provide:

Quarterly Training

Building skills in the core fireground disciplines at your fire department. FIRECORE develops the curriculum based on your needs and delivers hands-on training for your personnel tailored to your operations.

Train the Trainer

FIRECORE can train your training staff and line personnel to help shift culture and develop performance standards for your department.

Hosting Classes

Host a class at your department that can be open to other agencies. Support your regional capabilities and build relationships.

Engine Ops Training

Engine Company Operations are the fireground tasks focused on getting water on the fire and supporting suppression efforts.

Our Engine Ops training includes:

- ☑ Properly stretching attack lines in both residential and commercial environments
- ☑ Setting nozzle pressure to ensure adequate water flow
- ☑ Nozzle management from the ground up to ensure confidence when flowing water and moving inside the IDLH environment
- ☑ Hose management and the team dynamic of the engine company when inside
- ☑ Water supply from tank, hydrant, or tender

Truck Ops Training

Truck Company Operations encompass fundamental fireground skills that are required for a variety of assignments. These skills can be utilized by any company on the fireground, not just truck companies!

Our Truck Ops training includes:

- ✓ Conventional forcible entry
- ✓ Ground Ladders for ingress/egress
- ✓ Proactive fireground search operations by any means: Oriented searches, vent-enter-search, and everything in between
- ✓ Saw work

Fireground Survival Training

Fireground Survival training ensures proficiency with self-rescue skills and the mindset to survive a fireground emergency. This training is often times combined with yearly SCBA refresher.

Our Fireground Survival training includes:

- ☑ “Function checks” to ensure confidence in SCBA and with equipment being used
- ☑ Calling a MAYDAY and communicating key information
- ☑ Management of wire entanglements, diminished clearance, and breaching walls
- ☑ Ladder bailouts

Rapid Intervention Training

Rapid intervention goes beyond just the traditional RIT/RIC team deployment. Recent statistics have shown that proficiency in firefighter rescue must be present in all of the crews working within the structure, not just the RIT/RIC team.

Our Rapid Intervention Training Includes:

- ✓ Downed firefighter assessment and emergency management
- ✓ Packaging the downed firefighter with both traditional techniques and pick-off straps
- ✓ Trans-filling or regulator replacement with the RIT/RIC bag
- ✓ Removing downed firefighter from debris, removal from window
- ✓ Creating a high-point anchor to remove downed firefighter from elevated window

We've partnered with PROPerTy of Training Division to provide prop houses for our Search, Survival, and Rapid Intervention training!

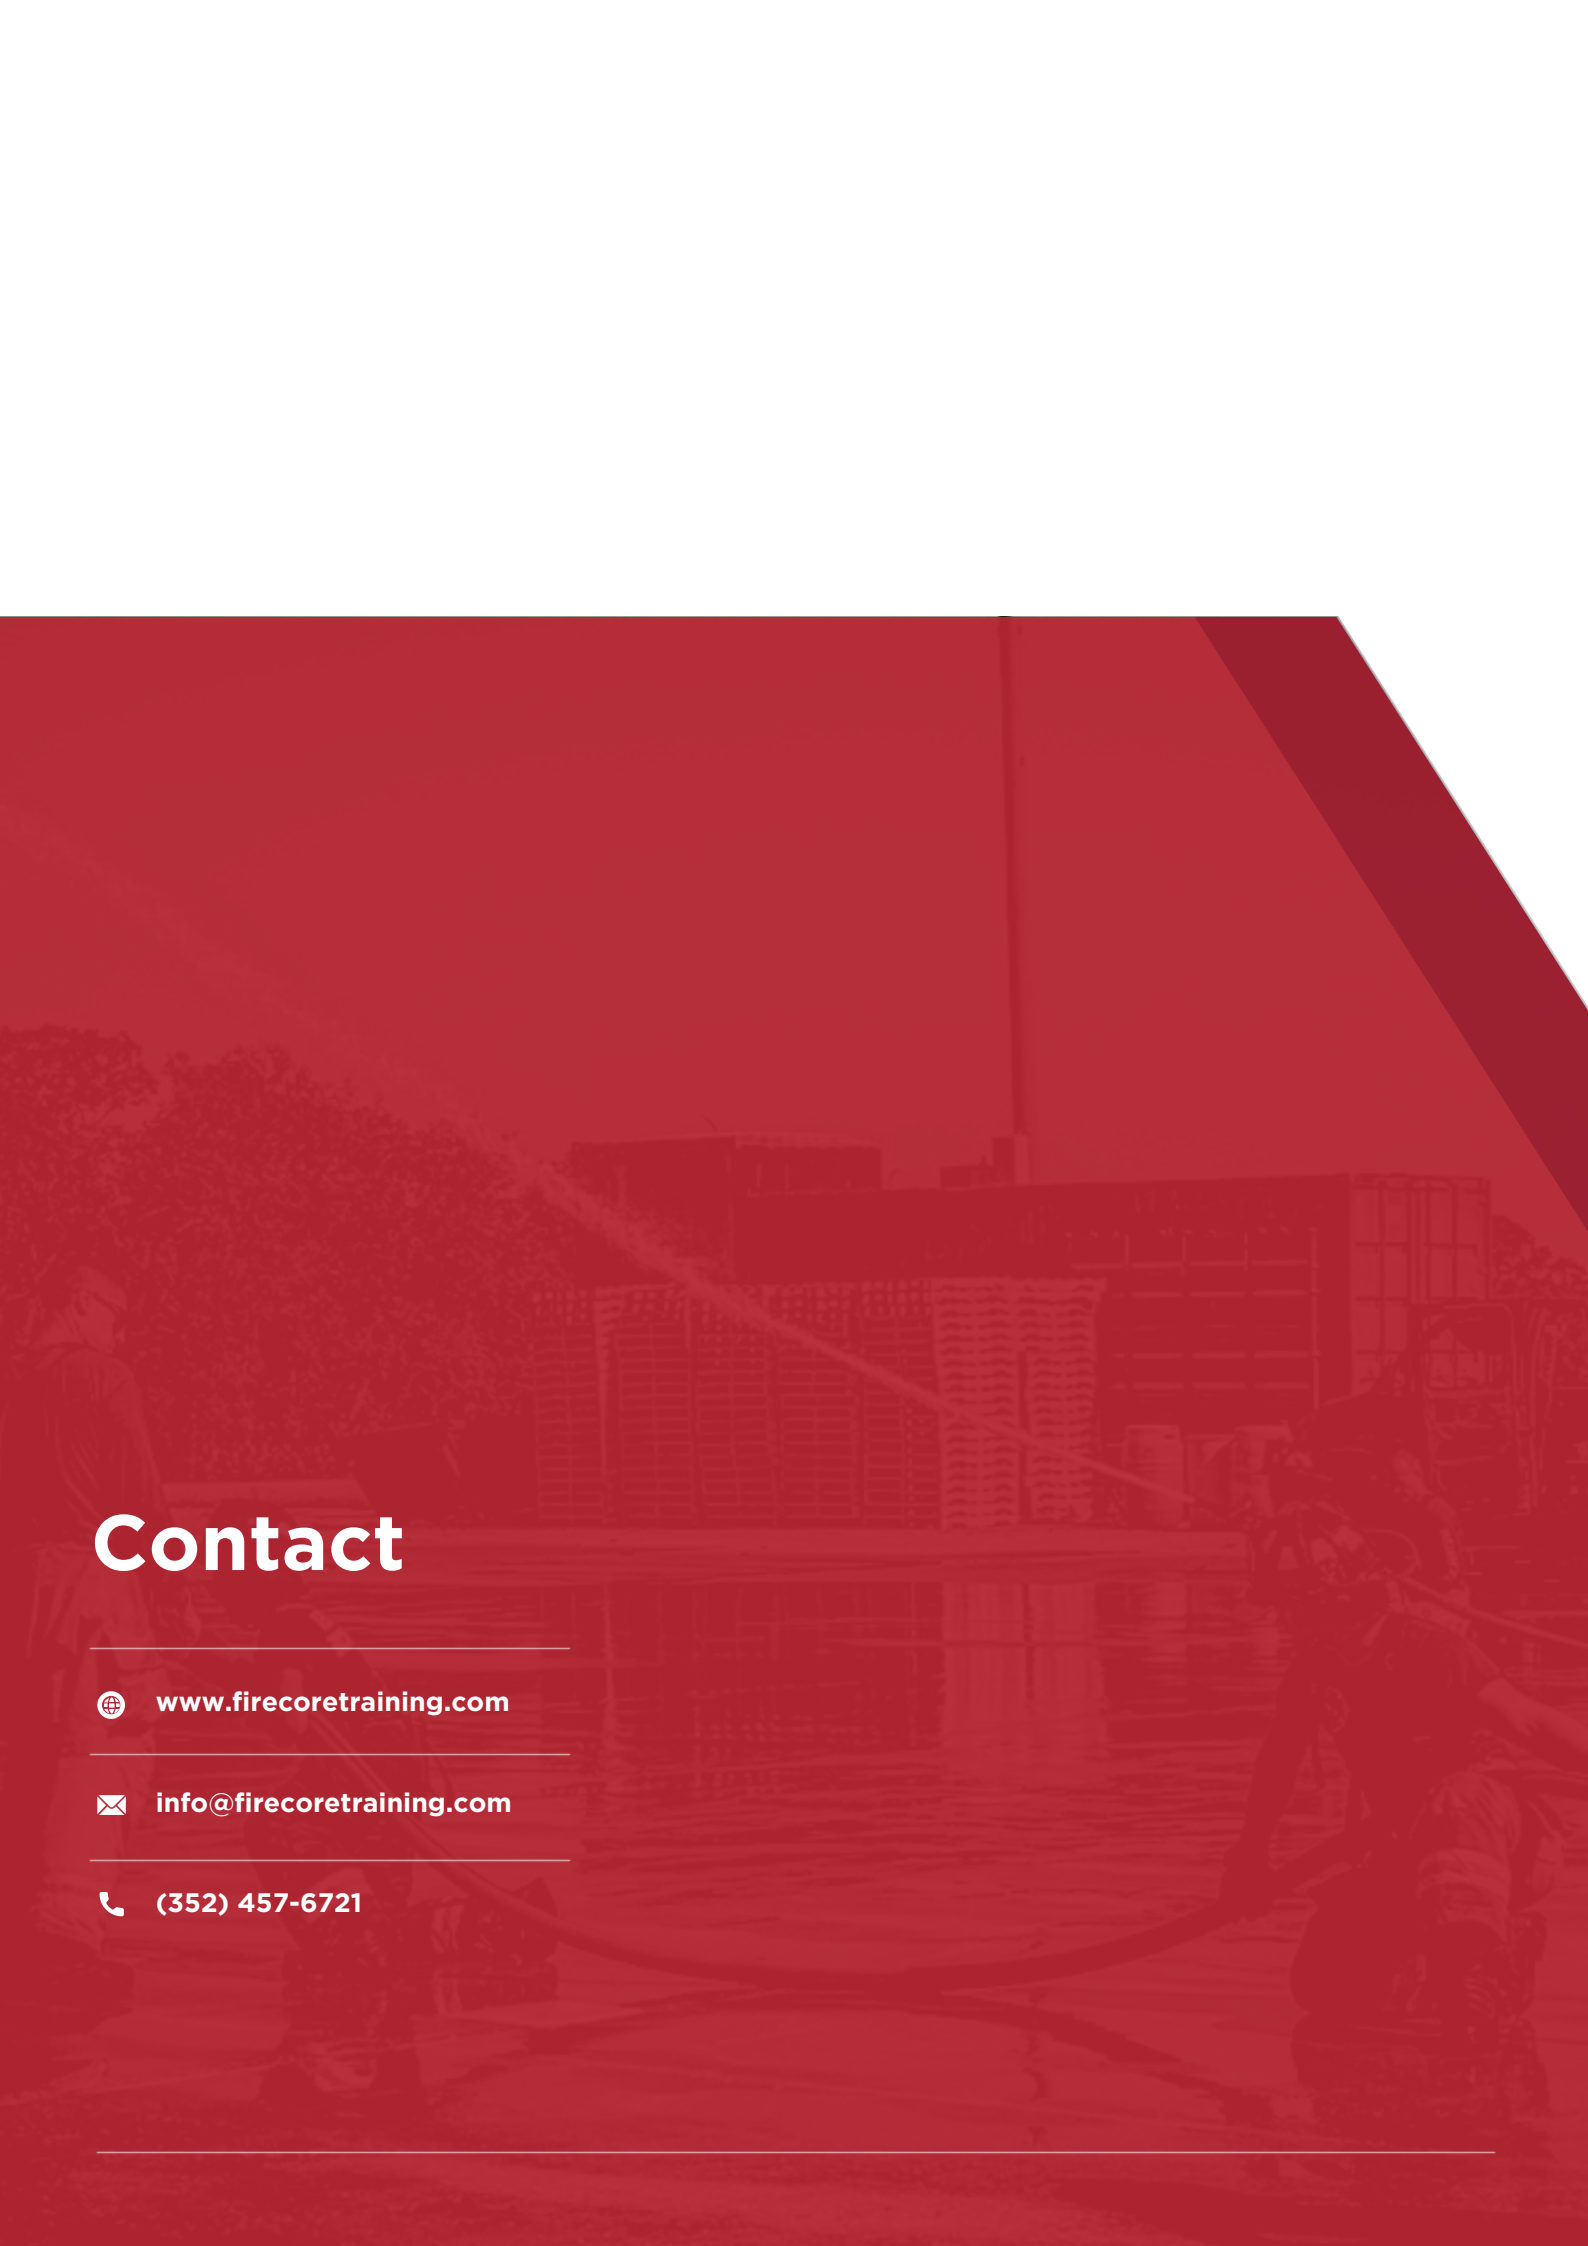

Tired of empty buildings or containers that don't replicate the real world environment?

PoTD provides realistic training structures that can be used in place of a facility or that can be used to enhance your current facility. These builds include realistic rooms, doors, and furniture. The best part – when you're done, PoTD will come and pick up the prop house. No storage required!

Why choose FIRECORE Training for your training needs?

- ☑ Experienced, passionate instructor cadre that teaches from the front lines
- ☑ Practical training built from the ground up based on industry standard practices, tailored to your operational methods
- ☑ Creation of a training environment that drives meaningful improvement for both newer firefighters and seasoned members
- ☑ Returning focus to fundamental fireground skills and culture building

The background of the entire page is a photograph of a fire scene. In the foreground, two firefighters in full protective gear are visible, one on the left and one on the right, both holding and directing high-pressure water streams towards a large building in the background. The building appears to be a warehouse or industrial structure, with smoke or steam rising from it. The entire image is overlaid with a semi-transparent red filter. A dark red diagonal stripe runs from the top right corner towards the center of the image.
